M8: Project ideas

Legal Tech:

1. Combining prompt-based language models and weak supervision for labeling named entity recognition on legal documents ⤷ (https://link.springer.com/article/10.1007/s10506-023-09388-1)

2. Automating petition classification in Brazil's legal system: a two-step deep learning approach ⤷ (https://link.springer.com/article/10.1007/s10506-023-09385-4)

3. A topic discovery approach for unsupervised organization of legal document collections ⤷ (https://link.springer.com/article/10.1007/s10506-023-09371-w)
